

POPCORN
AND DREAMS

CREATORS OF AMAZING ROOMS

Popcorn and Dreams are the first architectural and interior design studio specifically created to get you a turnkey home cinema.

We work with you to create world class interior designs for Home Cinema Rooms, Media Rooms and any other room which has a significant AV purpose.

Our team have been involved in the AV and architecture industry for a combined total of 25 years. In the last few years, as Home

Cinema installs have been on the increase, we felt there was a lack of a service and work was done just by AV integrators what had an impact on room design, so we wanted to create a company that will you will go to get top class interior design for cinema and media rooms, from people who also understand the technicality of home cinema.

Popcorn and Dream is a team of AV professionals, architects, acoustic engineers that together with the network of trusted suppliers of technical equipment and furniture manage all the aspects of your home cinema installation.

This allows us to be unique in offering designs that take in to account the AV products and help maximise their potential, giving you the dream room.

ABOUT US

“Popcorn and Dreams are the first architectural and interior design studio specifically created to make home cinemas”

OUR SERVICES

- FULL INTERIOR DESIGN**
Creating a bespoke interior design specifically for your room, based on your needs and taste. Representing the design with 3D renders, will allow you to exactly see how will your room look like after completion.
- TECNICAL SPECIFICATION DOCUMENTS**
Taking your room design to the next level with our AV and acoustic proffessionals. Choosing the right system for your room including speakers, projectors, screens.
- CONSTRUCTION WORKS**
Initial construction works through sound proffing the room, wiring, equipment sourcing and calibration, lighting, followed by wall acoustic panels covering and any automation feature you wish to have.
- INTERIOR FIT OUT**
Adding a final layer of interior design finish, with wide range of fabric wall panels, timber panels or endles bespoke solutions. Installing furniture and bespoke joinery.

Why add a cinema room
to your home or
apartment building project?

BENEFITS OF HOME CINEMA

- PRIVACY**
With an at-home cinema room, you can watch movies and TV shows without interruption and distraction. No longer is the TV shared with your kitchen or dining room, so you can get complete control over your viewing experience.
- QUALITY**
Home cinema room can be equipped with high quality system that can actually create you a better experience than going to the public cinema.
- UNIQUE EXPERIENCE**
Enjoying it yourself, with your family, hosting a movie night or sport events from your own home cinema room - will maximise the opportunity for fun and relaxation.
- INCREASED VALUE OF YOUR PROPERTY**
Cinema rooms became a must in luxury homes and in high end apartment buildings. This will definitely increase the value of your home or project.

Turn your room to the
Cinema or Media
room of your dreams....

Cinema rooms

Turn your cinema room to the room of your dreams. Never before have people had such easy access to world class interior design for their Cinema and Media Room projects.

We start from your existing room and design it from scratch, taking in to consideration all specified AV equipment, seating and clients brief.

The result is always a beautiful, bespoke, functional and inspiring design, presented with digital mood board and photo realistic renders. All our designs use carefully considered materials, such as stretched fabric and lighting that enhance the room design and clients cinema experience.

The result...a design that can be achieved with real products and materials. Easily take the concept to realisation.

Media rooms

Media rooms are a perfect solution for clients that want that multifunctional space, able to transform from beautiful living space to high performance media room. We are able to design rooms that have high quality AV systems, blended perfectly into an everyday room.

It may be a perfectly designed piece of joinery, automated panels/walls revealing a large screen TV, or a full room design carefully and discreetly hiding all AV in plain sight - anything needed to create a dream media room.

However simple or complex the room, we will assist you with world class interior design.

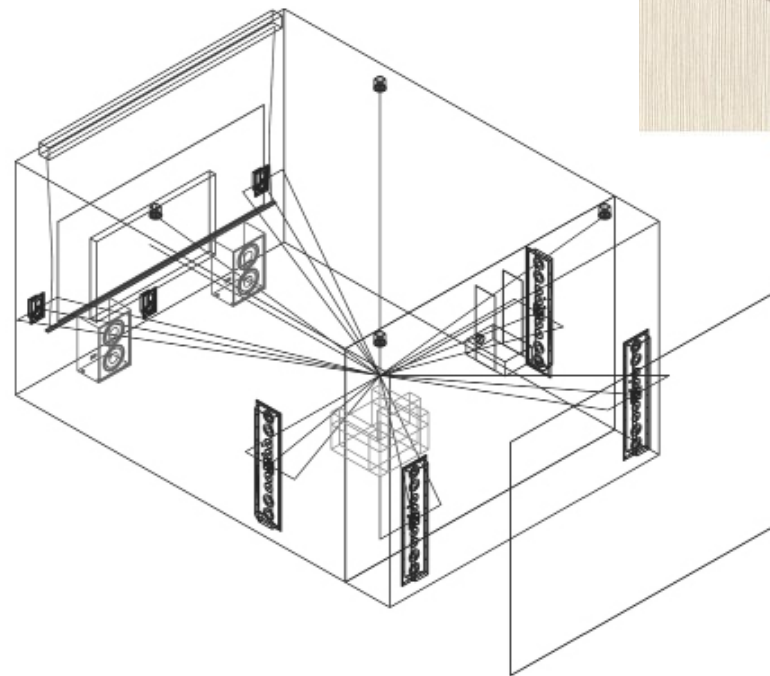

Slide Cinema

CASE STUDY/Private Client

Asked by the client for a full interior design service, to create cinema and entertainment space in their 200 years old family house.

The clients brief was simply that there has to be a slide within the room and it has to impress them!

We started from looking at the current style of the house and existing room, where we stripped out several layers of wallpaper in order to find the one we believed to be the original beige and green wallpaper. That inspired us and we decided to work with that colour range.

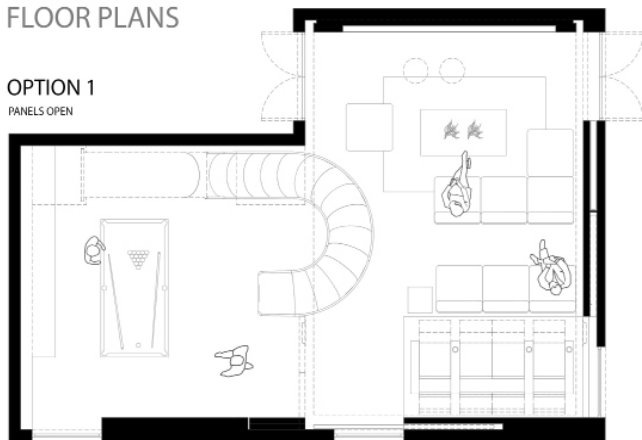

From a wide selection of our suppliers, we chose a beautiful combination of wallpaper and furniture that made the room look unique, much to the clients delight.

During the whole process, we worked closely with the AV integrator and client, including taking in to consideration the extensive AV equipment which included Wisdom speakers, JVC Projector and Control 4 lighting.

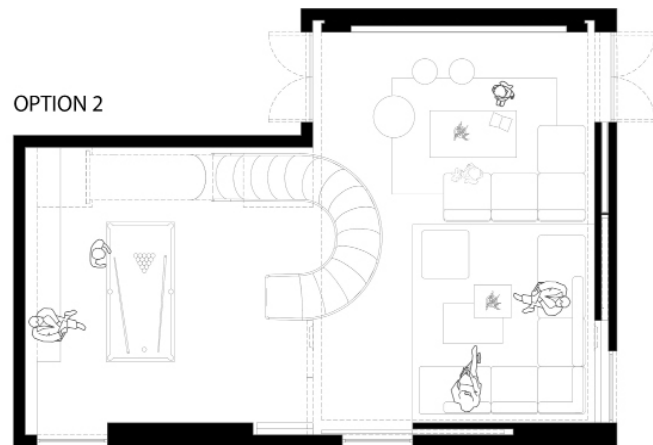

FLOOR PLANS

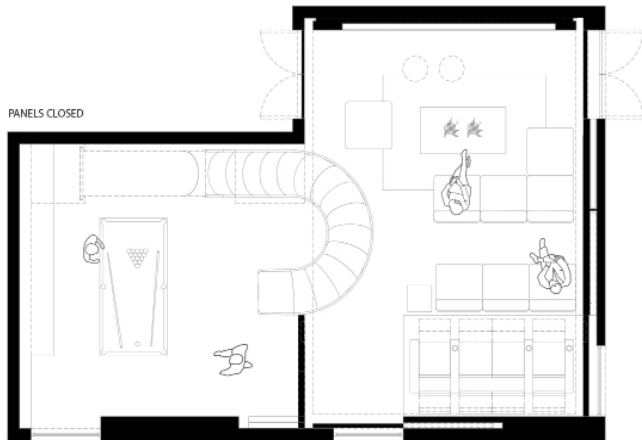

OPTION 1
PANELS OPEN

OPTION 2

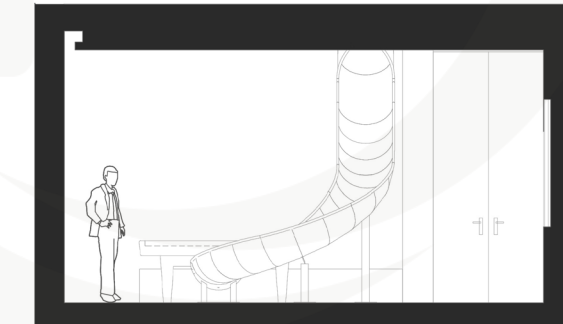

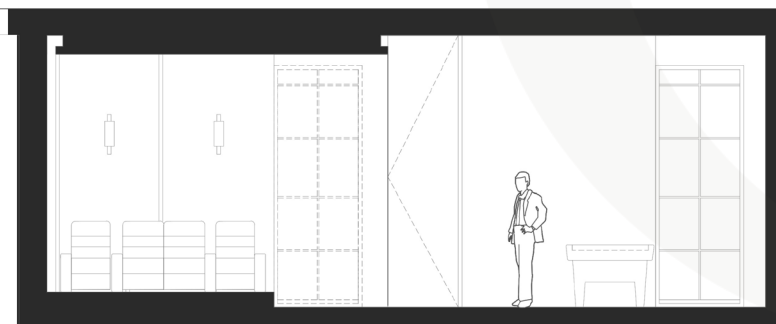

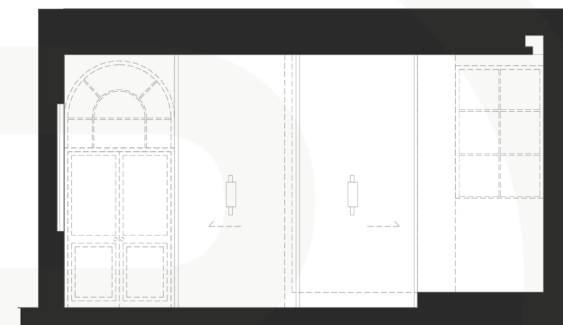

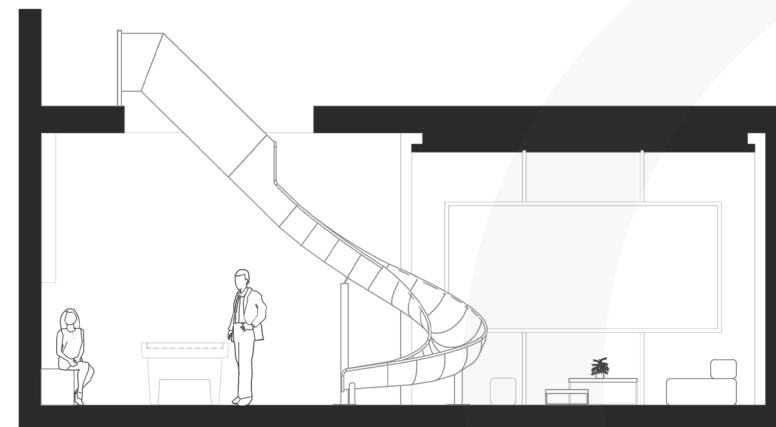

PANELS CLOSED

Another challenge was to ensure the space could totally transform, allowing it to change from a light filled entertainment space to a dark dedicated cinema room. This was accomplished by creating a set of moving panels and sliding doors.

The whole room had to be built out - a room within the room. We created a set of drawings to ensure the room was built exactly as intended.

ELEVATIONS

AFTER

“The result was a one off, unique design that delighted the client and everyone else who has experienced the room”
